FREE SPIRIT AT A GLANCE:

OUR MISSION STATEMENT:-

To 'Design & Build' a 'Durable, Lightweight Off Road Caravan'
using Australia's skills and resources – creating for the customer a most
'Improved and Advanced Product.'

- *Innovative design of chassis 'No weld of A frame to chassis'.*
- *Revolutionary design and build continues into the wall frames:
Free Spirit encase their aluminium frame within fibre glass panelling!*
- *The innovation is continued with a honeycomb composite being used for
the floors – providing strength and lightness.*
- *Innovation does not stop there where a Free Spirit locking system brings
together the light and strong (corrosion free) internal cabinetry.*
- *Built with quality in materials and craftsman ship – to last and last.*
- *16' to 18' all under 2 tonne tare.*
- *FEATHERWEIGHT WITH HEAVYWEIGHT STRENGTH*
- *Reduce your fuel intake – reduce your carbon footprint.*
- *A 'state of the arts design system.' The caravan takes shape with the
customers own specifications on a big screen: A 'Unique' and Innovative
Customer Experience all round in 'Product and Service.'*
- *FREE SPIRIT – EXPECT EXCELLENCE.*

OUR STANDARD INCLUSIONS:

Please check 'INCLUSIONS' when comparing **FREE SPIRIT** with different manufacturers.

- Full Structural Aluminium Chassis/Box Frame for strength –no weld of A Frame Patented
- Unique fibre glass wall paneling with aluminium frame 'in-laid'. Patented
- Insulated walls and roof
- Lightweight honeycomb composite flooring for strength and lightness.
- Independent coil suspension
- TWO 135 WATT CYOCERA SOLAR PANNELS
- TWO 120 AMP Deep cycle battery, maintenance free & fully sealed: for self power
- An automatic charging system (solar and 240v)

- Battery boxes
- A 240 mains power point on the exterior (In and Outlet)
- High efficiency long life fluorescent lights that burn $\frac{1}{2}$ the power of normal lights.

- Departure angle at back of our caravan – for outback driving
- Body armour on the caravan is Aluminium checker plate
- Stone guards set at front
- Wheel mounts onto the chassis, for the spare tyres
- Premier stainless steel sink
- Tinted Dometic windows
- Tinted and dust proofed windows with built-in-fly screens & block-out-blinds.
- Tasmanian Oak external cabinetry

YOUR COMFORT IS OUR TOP PRIOTIRY

You have the opportunity to up-grade further any part of our standard inclusions i.e. double size fridge, oven, washing machine etc. There is of course, a choice of different kitchen tops and cupboard fascias. A deluxe model of spring mattress is available, as well as your choice of length! There are different types of textured materials for the interior furnishings i.e. leather recliners.

DESIGN AND BUILD

Free Spirit have designed and constructed a complete 'aluminium chassis,' using a 'box frame' for further strength together with guaranteed durable and proven independent suspension. The patented design ensures no weld of the A frame to the chassis, **no 'weak spots'**. *Free Spirit* continue their innovation in a unique build system: their aluminium frame laid into the fibre glass wall panels, for strength and lightness.

ELECTRICAL: *Free Spirit* Off Road Caravans contain a tested and proven self sufficient 12v electrical system. Supplying the sealed maintenance free batteries are two 130w Kyocera solar panels. For peace of mind *Free Spirit* Caravans also include a high out-put battery charger. You will also have the choice of different sizes of ovens/washing machines depending on your needs. Lighting consists of extremely efficient fluorescent and L.E.D's. *Free Spirit* use a 12v compressor fridge, proven to be most efficient, this has been our experience the final choice remains with you.

PLUMBING: *Free Spirit* always use quality water pumps feed the Thetford cassette flushing toilet and the automatic gas hot water system. **Free Spirits** are fitted with high quality water storage tanks. The plumbing system is designed with off road travel in mind, therefore tanks are armoured for protection. On the factory tour you will see a demonstration of our superior water tanks & air conditioners. **Free Spirit** choose to line the inside of their showers with extremely lightweight fiberglass coating, to eliminate any chances of leaks developing.

SUSPENSION OPTIONS: Single axle, dual axle, coil & shock absorber and air bag – all heavy duty independent off road.

OVERVIEW: Engineered & designed with water tight doors and hatches allowing a water fording depth of around 1.2m, can be vital in the outback!

Built to take you to any destination! **The choice is yours.**
