

A 'FIRST' IN 'INNOVATION & DESIGN'

*The view from your window is whatever..
you choose it to be!*

Does the thought of escaping to the outback evoke images of Adventure, Exploration and Intrigue? In essence becoming a '*FREE SPIRIT*,' enabling us to find out for ourselves what our incredible Australian landscape has to offer, freeing us to embrace the wonders of the outback.

FREE SPIRIT had a mission to turn these 'thoughts,' into a reality. The *FREE SPIRIT* name itself evokes a sense of 'freedom,' which the company, certainly set out to deliver, how? By being determined to manufacture a durable, strong but essentially, '*LIGHT*' *OFF ROAD CARAVAN*'.

Many off road caravans are very heavy, so the main purpose of the design team at *FREE SPIRIT* was to achieve the build of a caravan that could be towed by an average 4 wheel drive vehicle like for instance a Prado. The *FREE SPIRIT* Company are very proud to have succeeded and this is quite a breakthrough as it now opens up the opportunity to own an off road caravan to the owners of lower cylinder engines as well as greatly reducing the fuel costs of the tow vehicle. (Legally a tare weight is the weight before adding personal extras, it is very important to check what is included in the Tare weight of the caravan you are looking at!)

FREE SPIRITS have 2 solar panels/air conditioning/shower/toilet and fridge in their Tare weight, and welcome their customers to the weigh bridge, guaranteeing no later surprises.

FREE SPIRIT have now achieved a patented design, delivering a strong durable Caravan -- 'Featherweight' with 'Heavyweight' strength!

As if this design breakthrough wasn't enough they have gone on to incorporate another first, combining aluminium structures for their internal cabinetry and a first in flooring with their choice of a honeycombed composite material, a lightweight advanced flooring.

To an outsider looking in at the company these design features may have seemed 'Revolutionary'

enough, this was not the case for the design team at **FREE SPIRIT**, having other design features 'on the drawing board!' They have now stepped further into the future, by being the first to incorporate their aluminium frame, actually 'inside' the fibre glass wall.

The FREE SPIRIT company have achieved so many 'Firsts,' yet on visiting their factory they take the time to make you feel welcome, happy to sit and personally design your dream caravan!

This design service is quite an experience, carried out via a big screen, linked to their computer. Having served you 'freshly brewed coffee' they interact with your design ideas while they

produce the 'dream caravan' in front of your eyes. A first class design service and first class customer service combined. It seems you come to expect a '**FIRST**' with **FREE SPIRIT**.

So the next time someone asks 'What does escaping to the outback conjure up for you?' Feel free to answer, 'Adventure, Exploration and of course essentially **FREEDOM.**'
