

Hi guys,

Just a quick note to give you some feedback on a recent work shop visit. Having owned and operated a auto repair, manufacturing business I have to say how impressed I was with the presentation of your workshop, premises and quality of the product. I suppose some clients are not familiar with quality welding of the alloy chassis and frame work but being associated with that field the only thing I could see was quality, the quality of welding was second to none. Your tradesmen should be proud of the workmanship they are producing. The sale staff were more than helpful and the computer imaging was very helpful. I walked away totally impressed. The only problem you guys will have is shifting to bigger premises to accommodate the influx of orders once your product really takes off. If we were to update to and bigger van would we buy a Free Spirit van, after visiting the so called opposition the following day you bet we would!!!

Regards,

Rob and Marg Cakebread
